Assignment 02

Question:

Create a multi-page website for a fictional business. You should choose a business (e.g., travel agency, restaurant, online store). The website should include the following pages:

1. **Home Page (20)**:
   - A welcoming message.
   - A navigation bar linking to all other pages.
   - A brief introduction to the business.
2. **About Us Page (20)**:
   - Information about the business's history, mission, and team members.
   - Images of the team and office/store (optional).
3. **Services/Products Page (15)**:
   - A list of services or products offered.
   - Descriptions and images for each service/product (optional).
4. **Gallery Page (10)**:
   - A gallery of images related to business (e.g., travel destinations, restaurant dishes, product images).
   - Each image should have a brief description.
5. **Contact Us Page (10)**:
   - A contact form for users to send inquiries.
   - Business contact information (address, phone number, email).

Requirements:

- Use **HTML** to structure the content of each page.
- Use **CSS** to style the website, ensuring it is visually appealing and responsive.
- Use **JavaScript** and the **DOM** to add interactivity.
- Every part contains different points.
- The optional part will contain some extra points, so it's up to you.
- If you think you're not able to create anything, you can skip it.
- Make sure to deploy it on Vercel or Netlify.
- 10 marks will be deducted for late submissions. So, it's best to submit them on time with how much work is done.

Deadline:

Till Coming Wednesday: 02-10-2024
